## Giancarlo Zema Design Group

Innovative Ecosustainable Architecture Studio

The Giancarlo Zema Design Group is an innovative architecture practice in Rome, specialized in smart eco-sustainable projects, semisubmerged architectural structures, floating habitats, yacht and interior design. Founded in 2001 by the architect Giancarlo Zema as a dynamic and flexible organisation, it covers the entire design process, from concept to the executive details. The GZDG uses advanced technologies and design software, which allow us to project and calculate different planning solutions. With the use of computer-aided design systems, we can create 3D models, prospective views and renderings, producing a full layout presentation. This offers the client all the necessary information on the project before the realization.

The main characteristics of our design are soft lines that clearly recall biomorphic forms. The GZDG is sensitive to new technologies and uses sophisticated high performance technological elements perfectly integrated in their organic designs. We believe that only when architecture and design blend with each other, something new has been created.

Our projects are frequently shown in international exhibitions, TV programmes and published in the most important scientific, design, nautical and architecture magazines and books.

NYMPHAEA | Ecological Floating Restaurant

TRILOBIS | Eco-Yacht with Underwater View

JELLY-FISH | Floating Home with Underwater View
